

Certification

Your certification tells your customers and colleagues about your qualifications and professionalism.

Choosing the right certification is crucial to your success .

Comparing before you decide helps avoid being fooled by marketing glitz. There is no substitute for integrity, credibility and independence.

ACAC Certifications

CIAQM

**Council-certified
Indoor Air Quality
Manager**

www.certificationcouncil.org

Integrity ~ Credibility ~ Independence

Who is a CIAQM?

A Council-certified Indoor Air Quality Manager (CIAQM) is involved in the operation of buildings and facilities as a property manager, facilities manager, asset manager or other risk management or corporate policy-making professional.

A CIAQM understands the relationships between these responsibilities and the many disciplines related to IAQ.

Candidates for the CIAQM come from a wide variety of positions:

- Property Managers
- Facilities Managers
- Asset Managers
- Risk Managers
- Building Engineers
- Project Managers
- Physical Plant Administrators
- Maintenance Supervisors
- Hospital Administrators
- School Administrators
- HVAC Consultants
- Human Resource Managers
- Operations Supervisors
- Purchasing Agents
- IAQ Coordinators
- Anyone involved in corporate or institutional policy-making decisions.

Why a CIAQM?

In today's complex world, employers are seeking professionals who understand the delicate relationships between building occupants and physical assets.

The CIAQM has an established reputation as an expert in these relationships as they relate to indoor air quality, a discipline which touches all aspects of occupied properties.

A green building is not an asset unless it can be correctly operated by those who understand the synergies between building systems and their occupants.

The Council-certified Indoor Air Quality Manager fills this need with the industry's most prestigious certification program:

- The CIAQM program is accredited by the Council for Engineering and Scientific Specialty Boards (CESB), a nationally recognized independent accreditation body.
- The CIAQM examination is administered according to published standards and sound psychometric practices.
- The CIAQM program is compliant with the International Organization for Standardization (ISO) standards for certifying bodies.
- Like all other ACAC certifications, the CIAQM is board-awarded by a nationwide panel of experts.

Become a CIAQM

Unlike "instant certifications" from "certification mills," the Council-certified Indoor Air Quality Manager requires an effort well worth the time and expense.

Complete application information is available for download from the ACAC website at www.certificationcouncil.org.

Candidates may prepare for the examination at their convenience by studying accepted industry publications. There are no required courses; however, study/review courses are available from a variety of independent providers. The ACAC has no financial or revenue-sharing agreements with course providers.

Exams are delivered electronically at secure testing facilities throughout North America and major cities worldwide. Exam results are delivered instantly; however, certification is awarded only after board review and is granted by unanimous vote.

Enhance your professional status by becoming a CIAQM. Visit the ACAC website at www.certificationcouncil.org or call our friendly staff toll free at (888) 808-8381.
