Preparing for the Council-certified Microbial Investigator (CMI) Examination

Examination Reference Materials:

The CMI examination is based on standard industry reference texts, not on a particular course curriculum. Examination items are drawn directly from the following references:

- ACGIH, *Bioaerosols: Assessment and Control* (Cincinnati, OH: ACGIH, 1999)

Examination Topics:

The 100-question, closed book examination covers *six topics* relevant to microbial investigations and consulting. Approximately twenty multiple choice questions are included on each of the following topics:

*(NOTE: For a detailed list of the knowledge and skills tested within each topic area, consult pages 2-3 of the CMI application booklet)*

1. Biological Agents
2. Potential Exposure-related Health Effects
3. Microbial Investigation Procedures
4. Microbial Sampling Procedures
5. Microbial Remediation Procedures
6. Respiratory Protection

Recommended Study Procedures:

To prepare for the CMI exam, first read the reference books listed above. Then review the following sections from each text in more detail:

**WARNING:** Limiting your study to only the following pages will put you in danger of failing the exam. The exam assumes a comprehensive knowledge of each reference text. Each of the following references provides ONE example of a place where exam topics may be discussed.
